

Features

- Automatic identification of the power polarity.
- Monitored by electronic load cell and flow sensor to double ensure precise fluid replacement.
- Reliable operation through the use of integrated functional pipeline modules.
- Various alarm/indication information and automatic protection measures prevent to damage ATF systems.
- Membrane keypad, LCD screen, simple operation with user friendly interface.

Specifications

- Function: cleaning, drain used oil, supply new oil
- New oil supply: 2.5L/Min
- Used oil drainage: 1.8-3L/Min
- Power supply: DC12V
- Load cell range: 40kg
- New/old fluid tank capacity: 25L
- Pump: 3.7 L/Min, 0.5 Mpa
- Equivalent exchange accuracy: ± 30 ml
- Pressure gauge range: 0~150psi
- Dimension: 560*625*1048mm.
